MISSION PEDIATRICS CELEBRATES A DECADE OF TRANSFORMING CHILD AND FAMILY HEALTHCARE IN GHANA

Mission Pediatrics, a leading neurodevelopmental and pediatric healthcare center in Ghana, is proud to announce its 10th Anniversary Celebration – marking a decade of dedicated service to children, families, and communities across the country.

Since its founding in 2015, Mission Pediatrics has been a trailblazer in providing innovative and compassionate care to children with developmental conditions and medical needs. The center has served thousands of children and families, launched impactful community programs, and championed advocacy for inclusive health and education systems.

Our journey over the past 10 years has been driven by a simple but powerful mission – to ensure every child, regardless of ability, has access to high-quality care, early intervention, and family-centered support. This anniversary is not only a celebration of our milestones, but also a recommitment to the children and communities we serve.

As part of the anniversary year, Mission Pediatrics is also commissioning its renovated facility, introducing corporate wellness partnerships, and rolling out its ASD Screening Tool in digital formats.

The center is calling on partners, health advocates, educators, and the general public to join in celebrating this remarkable milestone and collaborate to drive the next decade of inclusive healthcare innovation.
